

Amkor Technology, Inc. recognizes the importance of a healthy environment and is committed to preserve our natural resources, improve sustainability, and contribute to the quality of life in the communities where we operate. As part of this commitment, we have established practices worldwide to:

- ▶ Comply with legal requirements that protect the environment.
- ▶ Provide training to our employees to mitigate the risk of environmental accidents.
- ▶ Certify our factories to International Organization for Standardization (ISO) framework 14001, widely recognized as the standard for effective Environmental Management Systems
- ▶ Obtain independent verification of Greenhouse Gases (GHGs) measured and collected at our factories.
- ▶ Submit and disclose publicly GHG and Water data to the [CDP](#), formerly known as the Carbon Disclosure Project, a leading organization that assesses the impact of climate change and promotes a sustainable economy.
- ▶ Reduce GHG, water use and waste generation by 20%, 30%, 40% respectively, by the end of 2020 from levels established before 2014. We have either met or are on target to meet each goal.
- ▶ Commit to have our factories and suppliers follow the uniform [Code of Conduct](#) from the [Responsible Business Alliance](#) which includes standards of environmental responsibility.
