Environmental Policy Statement

Amkor Technology, Inc. recognizes the importance of a healthy environment and is committed to preserve our natural resources, improve sustainability, and contribute to the quality of life in the communities where we operate.   As part of this commitment, we have established practices worldwide to:

- Comply with legal requirements that protect the environment.

- Follow the uniform Code of Conduct from the Responsible Business Alliance which contains standards of environmental responsibility for our factories and suppliers.

- Provide training to our employees to mitigate the risk of environmental accidents.

- Certify our factories to International Organization for Standardization (ISO) frameworks 14001, for effective Environmental Management Systems and 14064-1 for the design, collection, and verification of Greenhouse Gases (GHGs).

- Submit GHG and Water use data to the CDP, a leading organization that assesses the impact of climate change. The results of CDP's assessment are disclosed on their web site.

Worldwide Environmental Goals – Established January 2021

- Reduce GHG emissions 20% by 2030 from the average of annual GHGs generated by our facilities from 2018 to 2020.

- Reduce the use of water 20% by 2030 from the average of annual water withdrawn by our facilities from 2018 to 2020.

- Reduce waste generation (hazardous, incinerated, recycled and landfill wastes) 20% by 2030 from the average of annual waste generated by our facilities from 2018 to 2020.
